**Product Owner | Agile Delivery | ERP & Process Automation | Driving Efficiency & Stakeholder Alignment**

---

## PROFESSIONAL SUMMARY

Technical Product Owner with 4+ years of experience delivering internal and client-facing digital products in Agile environments. Proven track record of driving process automation and improving operational efficiency, including reducing manual errors by up to 50%. Combines strong technical expertise in APIs, databases, and system integrations with the ability to translate business needs into scalable, high-impact solutions. Skilled in stakeholder management, backlog prioritization, and cross-functional delivery.

## CORE SKILLS

### Product Management & Agile

Product Lifecycle Management • Product Discovery & Requirements Gathering • Product Roadmap Support • Product Ownership • Backlog Prioritization & Refinement • User Stories & Acceptance Criteria • Agile Scrum (Sprint Planning, Reviews, Retrospectives)

### Stakeholder & Business Analysis

Stakeholder Management • Requirements Engineering • Business Process Analysis • Process Improvement & Automation • Cross-Functional Collaboration

### Technical & Data

RESTful APIs • System Integrations • SQL & NoSQL Database • ERP Systems (Odoo) • Backend-Driven Products • Database Analysis

### Delivery & Quality

UAT Planning & Execution • QA Coordination • Root Cause Analysis • Release Planning & Readiness

## TOOLS & TECHNOLOGIES

- **Product & Collaboration:** Jira, Confluence, ProductPlan
- **Design & Prototyping:** Figma

- **API & Testing:** Postman
- **Databases:** MongoDB, MySQL
- **Development (Working Knowledge):** JavaScript, React, Node.js
- **Version Control:** Git
- **Modeling & Architecture:** ER Diagrams, User Flow Diagrams, System Architecture Diagrams
- **Enterprise Systems:** ERP (Odoo)

## PRODUCT PROJECTS

### TRUSTED CARPOOL NETWORK (PERSONAL PRODUCT INITIATIVE)

A secure and verified commuter matching platform designed to improve safety and trust for daily work commutes.

- Conducted user research and validation around commuter safety and trusted ride sharing.
- Defined product vision, MVP scope, user journeys, PRD, and roadmap.
- Designed user flow diagrams, ERDs, and system architecture.
- Defined authentication, verification, matching, notification, and payment workflows.
- Built backend services and REST APIs using Node.js and PostgreSQL.
- Collaborated across business and technical considerations to prioritize features and delivery phases.
- Evaluated trade-offs between relational and NoSQL databases, selecting PostgreSQL based on data integrity and relationship requirements.

## PROFESSIONAL EXPERIENCE

### PROJECT MANAGER

A.M Amosken Nig Ltd | Feb 2023 – Present

- Led cross-functional teams (engineers, contractors, suppliers) to deliver projects on time and to quality standards
- Managed project planning, scheduling, and resource allocation, reducing delivery delays by **50%**
- Oversaw procurement workflows and vendor negotiations, improving cost efficiency and budget control
- Monitored budgets and implemented cost optimization strategies
- Ensured regulatory compliance through coordination of permits and inspections
- Maintained stakeholder alignment through regular reporting, issue resolution and progress review.

### SOFTWARE DEVELOPER (STUDENT SUPPORT)

Staffbase GmbH, Germany | Jun 2020 – Nov 2021

- Designed and tested and documented RESTful APIs supporting internal applications and system integrations.
- Built and deployed a full-stack MERN application using MongoDB, Express, React, Node.js.
- Collaborated with Agile delivery teams to implement and release production-ready features
- Participated in sprint planning, backlog refinement, estimation sessions and requirement clarification
- Improved system performance through testing and debugging

## **BUSINESS ANALYST / TECHNICAL PRODUCT OWNER**

**A4S Limited (formerly G4V Limited), Nigeria | Oct 2010 – Feb 2015**

- Delivered digital products in Agile Scrum teams using 2-week sprint cycles.
- Collaborated with stakeholders to define product requirements and translate them into user stories, acceptance criteria, and delivery-ready specifications.
- Led ERP automation initiatives that reduced operational errors by **15%** and improving efficiency by **20%**.
- Collaborated with engineering teams on API design, integrations, and data workflows
- Managed backlog prioritization, balancing business value, customer needs, and technical constraints.
- Acted as the primary liaison between business stakeholders, developers, and QA team.
- Coordinated User Acceptance Testing (UAT) and ensured delivered solutions met business requirements and quality expectations.
- Performed SQL-based analysis to support reporting and decision-making.
- Conducted root cause analysis and supported issue resolution during product delivery.

## **NYSC – TEACHING EXPERIENCE**

**Offa Baptist Junior Secondary School, Kwara State | Jul 2009 – Jul 2010**

- Completed National Youth Service Corps (NYSC) program

## EDUCATION

### M.Sc. Web Engineering

Technische Universität Chemnitz, Germany | Oct 2016 – Mar 2021

### B.Tech. Mathematics & Computer Science

Federal University of Technology Owerri, Nigeria | Aug 2003 – Aug 2008

## CERTIFICATION

- Certified Scrum Product Owner (CSPO)
- Advanced Product Management — **Enoverlab**
